25: Threat to Human Life/Safety: Evacuation(s) in progress No evacuation(s) imminent					Residence Commercial Property			ty	2,100		0	0	
Potential future threat <b>XX</b> No likely threat					Outbuilding/Other								
12 hours:	Iovem		-						ames:	apes	with a	south o	

48 hours:

72 hours:

- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours:
- 24 hours: Holly shelter gameland and associated wildlife habitat and timber resources. Threatened and endangered species are present.

48 hours:

72 hours:

- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours:
- 24 hours:
- 48 hours: Engine strike teams

72 hours:

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Deep organic soils continue to burn due to long term drying. Many fire danger indices

are at extreme levels (Ignition Component-IC and Energy Release Component -ERC) with others setting new maximums (Spread Component-SC, Burning Index-BI and Keech-Byrum Drought Index-KBDI) for the day. Fuel moistures are also at extremely low levels. Very high heat causing firefighter safety issues.

30: Observed Weather for Current Operational Period Peak Gusts (mph): **14** Max.

Temperature: 100 Wind Direction: **SW** Min.

Relative Humidity: 52

31: Fuels/Materials Involved: **4 Chaparral (6 Feet)** Pocosin fuels. Also fuel model 7-Southern Rough

32: Today's observed fire behavior (leave blank for non-fire events):

Significant re-burn and torching in re-burn areas. Significant burning of organic soil continues. Smoldering and creeping within fire interior observed, particularly on south and southeast side of fire.

33: Significant events today (closures, evacuations, significant progress made, etc.):

A hand held infrared heat detection flight was conducted today to help identify hotspots for ground resources to focus on.

34: Forecasted Weather for next

Operational Period

Wind Speed (mph): 6 Temperature: 97 Wind Direction: **SW** 

35: Estimated Control

36: Projected Final Size: Relative Humidity: Date and Time: Unknown

37: Estimated Final Cost:

52

38: Actions planned for next operational period:

Continue to strengthen control lines on the southern perimeter of the fire. Continue mop-up and patrol of all lines. Continue rehabilitation of lines in places where fire is not a threat to escape.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential High
- 2. Difficulty of Terrain **High**
- 40: Given the current constraints, when will the chosen management strategy succeed?
- 41: Projected demobilization start date:

In addition to the resources listed below, 1 motor grader is assisting with rehabilitation and road maintenance.

## 43: Committed Resources (Supplemental Committed Resources follow the first block)

Agency	CRW1		CRW2		HEL1	HEL2	HEL3	ENGS		DOZR		WTDR	OVHD	Camp	Total

44: Cooperating and Assisting Agencies Not Listed Above:

State Resources listed above include NC, VA, and SC. Cooperating agencies not listed above include, Pender Co. Sheriffs Dept, Nature Conservancy, Pender Co. EM, Onslow Co. EM, Pender Co. EMS, NC Emergency Management, Camp LeJeune, Pender Co. Fire Marshall, NC Wildlife Resource Commission, Pender Co. VFD, NC Dept. of Transportation, NC State Parks.
